

Teaching Internet Governance

The experience of the International Summer Schools on Internet Governance (ISSIG)

International Summer Schools on Internet Governance

Background

- **Situation:**
 - No Internet Governance curricula at university level
 - Some exceptions for some elements (Harvard, Oxford)
 - every stakeholder (expert) group separated
 - less overall basic knowledge
- **Idea:**
 - Summer school project for five regions
 - born at the ICA/IAMCR 2006 Workshop
 - GIGANET launch 2006 (in connection with IGF)

Experiences

- Euro-SSIG in Germany as a pilot project successful since 2007
- South-SSIG in Buenos Aires / Sao Paulo / Mexico (2009 - 2011)
- Arabic-SSIG in Cairo (2009)
- Planned: African-SSIG

Concept

Learning in a multistakeholder environment

- Multidisciplinary 50 hours academic course 5 days (nights)
- Group of 25-30 students and 20 faculty members
- Graduate students, academics, business and governmental people
- Theoretical lectures, Workshops
- Practical presentations (business sector, students)
- Interactive communication between faculty and fellows
- Regional influences

Programme / Faculty (excerpt)

- History Wolfgang Kleinwächter – University of Aarhus
- Technology Avri Doria – Lulea University
- Policy William Drake – Institute of international and development studies
- Theory Milton Mueller – Syracuse University
- Law/Security Jon Bing – University of Oslo, Michael Heller – SHSG Layers
- Development Olga Cavalli - University of Buenos Aires
- Government Bertrand de la Chapelle – French Foreign Ministry, Marcus Kummer - IGF
Michael Niebel – European Commission
- Business Ayesha Hassan – ICC, representatives of various registrars
- ICANN Issues Massimiliano Minisci – ICANN
- Human rights Wolfgang Benedek – University of Graz
- Regional Perspectives local actors, registrars

International Summer Schools on Internet Governance

Programme Run

- First evening: Start with dinner and self introduction
- Morning: joint lecture followed by Q&A session in the morning
- Afternoon: Workshops in the afternoon
- Evening: Students presentation in the evening
- Last day: Handover of certificates
- Social programme (boat tour, local historic sites, gala dinner)

Facts and Figures

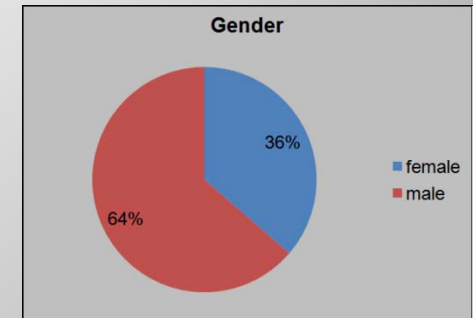

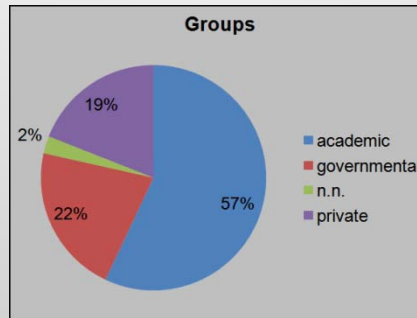

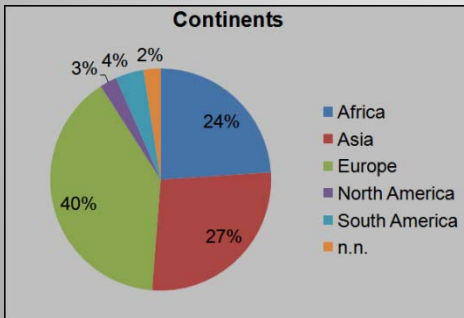

- About 120 applications from all over the world
- group of 25-30 students and 20 faculty members
- Criteria: geographical, gender and professional balance
- Global fellowship programme

WELCOME TO THE ISSIG COMMUNITY...

Edit

...of former summer school fellows!

Various Summer School on Internet Governance (SSIG) took place and are planned all over the world, since the first European Summer School (EuroSSIG) started in 2007, in Meissen/Germany. Since then we are a growing community of currently about 200 members, both students and faculty. Each of the regional Schools on Internet Governance is formally independent but all SSIGs follow the same principles and procedures.

This community platform should encourage fellows of any SSIG to stay in contact and get to know the fellows from other summer schools. It should also foster the exchange on internet governance related issues, help you to find partners for your projects or promote your events.

The platform is open for everybody to read, but if you like to join a group you have to be approved.

If you plan to organise a Summer School on Internet Governance in your region please do not hesitate to contact Wolfgang Kleinwächter (Chair of the I-SSIG) or Sandra Hoferichter (Coordinator) for more information.
